

ENFAC: Advanced Korean Air Technology for Smarter Ships - Clean Air. Safe Crew.

PMS S.A. is pleased to announce that has established a close cooperation with **ENFAC** to offer their cutting-edge air purification systems as part of our wider portfolio of quality solutions.

ENFAC is a leading Korean manufacturer specializing in **high-performance air purification systems**, with a strong focus on the maritime sector. Designed to meet the unique demands of onboard environments, ENFAC solutions offer advanced removal of fine dust (PM2.5), harmful gases, and airborne pathogens, significantly improving air quality for crew and passengers alike.

With growing global awareness around the importance of indoor air quality at sea, maritime authorities are actively working on new regulations to address this critical area. Introducing certified and high-performing solutions like **ENFAC positions shipowners ahead of evolving compliance standards and enhances onboard health and safety.**

Backed by an **extensive reference list**, ENFAC systems are already trusted by numerous **international operators, including well-known Greek shipping companies**, further demonstrating their effectiveness and reliability in real-world maritime applications.

Smart Air Purification and Sterilization System

Our product provides clean and safe air, protecting against the risk of viruses and meeting the societal demand for indoor air quality. It is designed specifically to address structural issues in the unique indoor air environment of ships, where air circulates only through the HVAC system.
