

PMS S.A. offers Main & Electrical Generator Repairs at Sea

We are pleased to inform you that PMS S.A. offers comprehensive repair services for Main & Electrical Generators at sea, ensuring minimal downtime and maximum cost efficiency for your operations.

As an example of our capabilities, our expert team completed the repair of a 550 KW Main Generator at sea. The generator was successfully removed from the engine room, transferred to the deck, and fully repaired within 14 days.

In another instance, we carried out repairs on a 900 KW Main Generator again at sea, showcasing our ability to perform under challenging conditions.
